# CheckinAsyst

Reimagine  
Patient Intake

> Slide to check in

CheckinAsyst is an automated platform for patient intake and communication that engages your patients in their care delivery. By digitizing paperwork and automating workflows, you can free up your staff to focus more on what matters for your practice- quality patient care!

**25%**  
increase in copay  
and balance  
collections.

**20% decrease**  
in patient no-shows  
with appointment  
reminders.

**50%**  
or more reduction  
in patient wait times.

**40 minutes**  
or more decrease  
in administrative work.

CheckinAsyst has helped us eliminate costly paper, enhanced our ability to collect more revenue, and improved the overall check-in process and patient experience.

**Tony Molchany**  
CEO  
Mercer Bucks Orthopedics

We included mandatory questions in the patient forms to collect quality measures for MIPS. I am happy to say, we already achieved the highest allowable points this year for quality.

**Evie Van Rijs**  
Clinical Services Manager  
Tallahassee Neurological Clinic

## Zero-touch Patient Intake

---

With CheckinAsyst, patients complete their pre-visit information from home using their mobile or computer. Patients review or update their demographic and clinical data, complete assessments, and sign consent forms before paying their copays and balances via flexible payment modes.

CheckinAsyst is tailored to adapt to COVID-19 safety protocols. The solution offers a zero-touch workflow, including a QR code-based arrival and an in-built COVID-19 screening questionnaire.

The remote and zero-touch process offers a safe and convenient check-in experience for your patients. The solution comes with an ad-free and user-friendly interface designed to enhance patient satisfaction.

## Intake for Telehealth

---

CheckinAsyst's Intake for Telehealth module will transform your telehealth visits into a truly virtual care experience. The combined solution offers a safe environment for your patients by eliminating overcrowded waiting rooms.

It enables you to keep elective procedures and other lesser essential healthcare services operating through the pandemic.

When it comes to telehealth, CheckinAsyst is vendor-agnostic and can work with a telehealth solution of your choice:

## Patient Communication Hub \_\_\_\_\_

CheckinAsyst Communication Hub offers you all the necessary tools to enable seamless, real-time, secure, and compliant communication with your patients.

Pick and choose from an array of offerings and the channel of your choice that includes email, text messaging, and voice messages. The offerings include:

Appointment reminders

Payment reminders

Patient broadcasts

Secure chat

Patient surveys

## Use Patient-Reported Outcome (PRO) to Your Advantage \_\_\_\_\_

With CheckinAsyst, collecting and reporting Patient-Reported Outcomes (PRO) becomes a breeze-be it SDOH, data for MIPS reporting, or data for other compliance and grant requirements.

## Improve the Financial Health of Your Practice \_\_\_\_\_

Don't keep patient dues on the back-burner anymore. CheckinAsyst offers flexible and patient-friendly ways to collect patient dues, including POS collections, payment without appointments, and payment plans.

## The Flexibility You Expect

CheckinAsyst also allows you to set-up a check-in workflow at the facility.

- 'Use Your Own Device' option for the patient to complete check-in from home or even after arriving at the facility
- Introducing 'QR Code Scanning' zero-touch, check-in mode for the patient to confirm arrival at the facility using their own device
- Self-service or assisted patient check-in modes
- Choice of form factors including stand-alone and table top kiosks, and hand-held check-in devices

Reduce wait times

Flexible payment options including payment plans

Simplified communication with your office

Easy copay and deductible status

Patients control their own health information

## Improve Efficiency of Your Clinical Workflows

Your provider will now have real-time access to updated and easy-to-read patient data. The provider can reconcile clinical data entered by the patient before it becomes a part of the patient chart within your EHR.

Reduce clicks

Update patient charts easily

Capture error-free data

## The Front Office Command Center

An easy-to-navigate dashboard serves as the command center for your front office.

This comprehensive view of your schedule allows your staff to monitor and control patient check-in, launch on-demand forms,

and access detailed insurance eligibility information.

Reconcile patient updates into your PM software in just a couple of clicks. Front office can schedule auto-generated reports to track relevant metrics.

- Eliminate long queues
- Accomplish a paperless front-office
- Accelerate patient payment collection
- Gain powerful insights on revenue collection
- Increase focus on patient care rather than paperwork

## End-to-End Digitization for a Dynamic Workflow

The intake process can be quite dynamic, and many a time, there may be a requirement for the patient to complete more forms than that are part of the standard workflow. With CheckinAsyst, you don't have to resort to paper in such cases.

You can easily trigger an on-demand form to a specific patient to make it part of their workflow.

## Security and Compliance

Our customers' data security and privacy is our top concern. CheckinAsyst is a HIPAA compliant solution developed by an ISO 270001 and SOC 2 Type II compliant organization.
